Product Description

Kress 60 V / 5 A Charger - KA3714

The Kress 60 V 5 A charger is designed for smoother and faster charging. The inbuilt smartlink battery management and cooling system not only charges batteries in minutes, it provides better protection for the battery cells and guarantees a longer overall service life.

- Quickly charge your 60 V battery in 25 minutes (2 Ah) to reduce your downtime between charges
 - Provides the optimal charging current while constantly analyzes battery data, protect battery cells
 - Cooling system prevents overheating and prolongs the overall service life of the battery packs
 - The built-in charge indicator shows the status of charge
-
