Product Description

Wright ZXL 61" EFI Zero Turn Mower

DURABLE. COMFORTABLE. PRODUCTIVE.

The all-new ZXL zero-turn rider fills the gap between our current ZTO and ZXT models and is a welcomed addition to our ZX series of commercial riding mowers. Built on the same frame as the ZXT, the ZXL shares the extreme durability and construction of the ZXT but in a lighter, more compact, and more affordable package. The ZXL is equipped with powerful EFI engine offerings, large 24" rear tires, a premium bolstered suspension seat, and Aero-core deck, along with 15.5 gallons of fuel capacity. The ZXL is available in 52 and 61-inch deck sizes and is compatible with the WrightVac power bagging system, making it a versatile and valued asset in your fleet.
