Product Description

Maruyama MCV31R-14 Rear Handle Chainsaw

The ideal saws for professional landscapers and tree care experts looking for a lightweight heavy duty saw. Well suited for cutting firewood, dead wood removal, and clearing wooded areas, excellent for disaster recovery and clean up. Incorporating the latest in chainsaw technology including full anti-vib systems, reduced kickback system, chain stop break, inertia activated chain brake for safe operation, and easy-to-reach heavy-duty air filtration system.

Combining excellent balance and power to give precision cuts every time, you will have total control even in the toughest situations.
